

Phosphorus-Free Fertilizer For Lawns

Grass Magic™ Premium Fertilizer contains slow-release nitrogen and minor elements to provide long lasting benefits to your lawn or garden.

Unlike soluble fertilizers which release their nutrients immediately after water is applied, Grass Magic™ nutrients are released only as needed by the plants, so they continue to be effective over a much longer period of time – increasing root development and plant vigor.

How to Apply – Lawns

For the quickest results, water soon after application and regularly thereafter. While watering is not absolutely necessary, Grass Magic™ will not burn your lawn if it is not watered after application. Keeping roots moist is always advisable in a successful lawn care program.

Your lawn will begin showing beautiful results and signs of less turf stress in one to two weeks. Within four to six weeks turf grass will show significant visual improvement. A second application may be required to achieve best performance.

Repeated Grass Magic™ applications will enhance plant vigor and help to protect your lawn against stress during periods of drought, heat and severe cold.

For maximum effectiveness, prepare your lawn by aerating or de-thatching before applying Grass Magic™. Apply according to the application rates provided below.

APPLICATION RECOMMENDATION

COOL SEASON GRASSES (Bluegrass, Fescue, Ryegrass):
Apply 3 to 5 times annually at a rate of 3/4 lbs. of Nitrogen/1,000 sq. feet.

WARM SEASON GRASSES (Bermuda, St. Augustine, Zoysia):
Apply 4 to 6 times annually at a rate of 3/4 lbs. of Nitrogen/1,000 sq. feet.

Do not apply more than one pound of nitrogen per 1,000 sq. ft. per application. To hasten results, aerate soil before application and water afterward.

SPREADER SETTING INFORMATION

Read Before Using Product.
APPLY ONLY AS DIRECTED.

The following spreader settings are approximate and will vary with equipment condition and application techniques. You may need to adjust these settings to achieve the desired coverage.

TYPICAL SPREADER SETTINGS:	Lbs. of Nitrogen/1,000 sq. ft.	
	30# Bag (6000 sq. ft.) 3/4	30# Bag (4500 sq. ft.) 1.0
ROTARY SPREADERS		
Scotts AccuPro 2000/R-8	P	R
Scotts Speedy Green 3000	6.75	7.25
PSB Prizelawn CBRIII	N	O
Earthway Ev-N-Spred C24ss	1.5	1.6
Spyker 76	4.8	5.2
DROP SPREADERS		
Scotts AccuGreen 1000, 2000, 3000	7	9

- Provides quick acting repair and renewal
- Reduces stress caused by drought, heat and cold
- Fortifies and lengthens roots for plant vigor

Guaranteed Analysis 15-0-7

Total Nitrogen (N)	15.00%
0.4% Ammoniacal Nitrogen	
4.1% Urea Nitrogen	
3.3% Slowly Available Water Soluble Nitrogen*	
7.2% Water Insoluble Nitrogen*	
Soluble Potash (K ₂ O)	7.00%
Calcium (Ca)	3.00%

Derived from: Feather meal, methylene urea, potassium sulfate, calcium carbonate, urea, meat and bone meal, kelp meal, ferrous oxide, magnesium oxide, manganese oxide, copper oxide, zinc oxide.

*Contains 10.5% slow or controlled release nitrogen derived from feather meal and methylene urea.

How to Apply – Trees and Shrubs

Fertilize trees and shrubs as new growth begins in the spring and twice more at 6 week intervals. Avoid fertilizing in late summer – within 6 weeks of the first frost date.

DRILL METHOD: Apply one-half cup, 3-4.5 ounces, per inch of trunk diameter in 2-inch diameter holes drilled 12 inches deep (approximate) at 18 inch spacing around canopy.

SURFACE APPLICATION: Apply 6-9 ounces per inch of trunk diameter broadcast on soil surface around canopy. If grass is growing beneath tree, increase rate to 10-15 ounces per inch of trunk diameter.

How to Apply – Flower Gardens

New Beds: Apply 6 - 9 pounds per 400 square feet prior to planting. Work into the soil, then plant.

For Established Beds: Apply 6 - 9 pounds per 400 square feet around plant canopies. Work into soil if practical and water.

Repeat application every 4 to 6 weeks.

How to Apply – Vegetable Gardens

Apply in furrow for row crops at 3 - 9 pounds per 400 square feet or broadcast 6 - 9 pounds per 400 square feet. Make initial application when planting. Repeat application when plants begin to bloom and at 4 - 6 week intervals. Water after application. Do not mound product near the stem of the plant.

WARNING

Keep from reach of children. Do not inhale or ingest product. May cause irritation to eyes or sensitive skin. Material Safety Data Sheet is available upon request. For longest storage life, keep sealed tightly after opening and store in a dry place.

WARRANTY LIMITATIONS

There are no warranties that extend beyond the guaranteed analysis on the face hereof. All claims against guarantee are limited to replacement of product or refund of purchase price, or by law.
