

Grass Magic

A Premium Specialty Fertilizer HORTICULTURAL APPLICATION PROGRAM

TREES AND SHRUBS:15-0-7

Method 1. Apply one-half cup to one cup 3 ounces---6 ounces per inch of trunk diameter in 2-inch diameter holes drilled 12 inches deep (approximate) at 24 inch spacing around canopy.

Method 2. Apply 6 ounces---9 ounces (1/2 cup to one cup) per inch of trunk diameter broadcast on soil surface around canopy. If grass is growing beneath tree increase rate to 10 ounces-15 ounces (1 cup to 1-1/2 cup) per inch of trunk diameter.

Method 3. Apply at 8 to 12 week intervals. Water after application for faster results.

CONTAINER PLANTS:

Method 1. For potting soil mix blend 11 pounds per cubic yard for potting up. 7 pounds per cubic yard for new seedlings, or 3 ounces---6 ounces (1/2 cup new seeds, to 1 cup) per cubic foot of potting soil mix.

Method 2. For top dressing of potted plants apply around rim of container per following chart and work into soil surface. Do not apply fertilizer near stem of plant. Water after application.

Method 3. Apply at six to eight week intervals depending on nutritional requirements of specific plants.

2 inch pot	1/10 teaspoon---1/5 teaspoon	10 inch pot	1 ¼ tablespoons---2 ½ tablespoons
3 inch pot	1/8 teaspoon---1/4 teaspoon	12 inch pot	2 tablespoons---4 tablespoons
4 inch pot	¼ teaspoon---1/2 teaspoon	14 inch pot	3 1/3 tablespoons---6 2/3 tablespoons
5 inch pot	½ teaspoon---1 teaspoon	16 inch pot	5 ¼ tablespoons---10 ½ tablespoons
6 inch pot	¾ teaspoon---1 ½ teaspoon	18 inch pot	7 tablespoons---14 tablespoons
8 inch pot	1 ¾ teaspoons---3.5 teaspoons	20 inch pot	2/3 cup---1 1/3 cup

FLOWER GARDEN:

Method 1. For new beds apply 6 pounds---9 pounds per 400 square feet. Work into soil. Proceed with planting.

Method 2. For established beds apply 6 pounds---9 pounds per 400 square feet around canopy of plants. Work into soil if practical and water if possible.

Method 3. Make initial application when planting, or immediately thereafter. Make a follow up application when plants begin to bloom and at 4 to 6 week intervals thereafter. Water after application if possible.

VEGETABLE GARDEN:

Method 1. Apply in furrow for row crops at 3 pounds---9 pounds per 400 square feet or broadcast 6 pounds---9 pounds per 400 square feet.

Method 2. Make initial application when planting, or immediately thereafter. Make following application when plants begin to bloom and at 4 to 6 week intervals thereafter. Water after application if possible. Do not apply concentration of product near stem of plant.
